Rita,

I am updating the PFAS files for our records, and wanted to make sure I included any additional Region 5 comments. I apologize if I missed it, but I did not see a follow-up email to the one below. If you can send any comments you have on the detailed activities document, I will be happy to incorporate.

Thank you,

Maureen

Rita

Send your information in. Not sure when we will have the chance to submit an updated package, but this issue will be around for a long while I suspect and so it is best to have all the appropriate information.

Bob

Thanks for your reply, Robert. Sorry for the delay in my response. Since you mentioned that you could possibly work some R5 edits in, I am attaching a few edits to the one page PFAS Background document. The one page document, PFAS EPA Activities looks fine. However, we would like to provide a summary of the significant work that is being done in R5's Drinking Water Program to the third document, Briefing Material - Detailed Summary of EPA PFAS Activities. Would we be able to have until 1pm EST on Thursday to provide you that input? Thanks for considering our request.

Subject: FW: PFAS Material for Administrator

Rita

I just saw your note after I sent the revised files into Mike Flynn. There has been a lot of back and forth on the format for these files, so much material has been combined/shrunk/omitted from the first two, the third file is more comprehensive (but also very redundant due to its formatting). If R5 has additions, we can probably work them in. It is not clear there will be a formal briefing – these files may be sufficient for the Administrator at the present time.

Subject: PFAS Material for Administrator

Mike,

Attached are three files with the information you requested on PFAS background and EPA activities. The first file (PFAS Background...) is largely the same as the PFAS background you shared with the Administrator last week, with a few changes and updated into his preferred format. The second file (PFAS EPA Activities...) is an overview of the agency activities on PFAS in the one-pager format. The third file (Briefing Material....) is the more detailed review of agency activities, current challenges and stakeholder concerns in response to the questions originally posed by you.

I would like to thank all of the agency leadership and their staff for their prompt responses in sending in materials and working with us to finalize these materials. The attachments reflect comments received, although given the length of the document some materials may not have been included.

This exercise has been helpful in informing the programs and regions at to what everyone is doing, which will help us as we collaborate with our colleagues in other parts of the agency to address the public health concerns related to PFAS.

Bob
